THE SPEEDLINE PRODUCT RANGE

Speedline Metal Systems

Stud • I Stud • Track • Deep Track • Extra Deep Track • Metal Furring Ceiling Systems • Wall Furring Systems • Resilient Bar • Metal Angle

Speedline metal has been vigorously tested and manufactured in accordance with quality assurance standards BS EN ISO 9002: 1994 Certificate FM 11168.

For assistance with specifications or performance details, contact your local branch.

Speedline Drywall Screws and Fixings

When you're working against the clock, putting up boards, you don't want to be slowed down by fixings that shear, snap or break. In fact, a cheap fixing that doesn't perform and causes delays, can end up costing you more in the long run. Speedline offer a carefully selected quality range that you can really rely on.

Speedline has got it taped!

Contractors involved in dry lining can get through miles of tape and these costs can really add up. The Speedline range of tapes offers you a quick and simple solution to saving money and includes:

- Self Adhesive Drywall Scrim
- Paper Tape
- Corner Tape

Speedline Sealants

A two in one acoustic and 4 hour fire rated intumescent acrylic mastic, suitable for low movement joints in most internal applications, including acoustic sealing of partitions, door casings and firewalls.

Speedline High Performance Boards

There will be times when specialist applications demand specialist boards. Speedline offer easy access to a non-standard range of boards such as:

- **Aquapanel** - a tough, impact resistant tile backing board that can be completely immersed in water and will gain full strength when dry.
- **Fermacell** - a multipurpose wall board offering good impact resistance and hanging strength. It also offers good sound proofing properties.
- **Pyrok** - a class 0 cement based, moisture resistant structural board used to give improved fire, sound and impact resistance. Increasingly used as a substrate for external renders.
- **Bluclad** - increasingly used as a substrate for external renders, as well as for wall cladding and infill panels.

Speedline Access Panels

To suit ceiling and wall systems. Available in fire rated and non-fire rated specification with beaded, picture and plaster frame options.

Speedline Aluminium Trims

Aluminium trims can be a high value item on a project. We offer a top quality, reputable range at prices which are extremely competitive. So the next time you need aluminium trims, just check out how competitive the Speedline range can be!
